

Daily Scrums

Andries Bingani, 856807 Jackson Dyora, 747772
Thabiso Leeuw, 814690 Khutso Mpaketsane, 806383
Lesego Seitshiro, 792986

August 12, 2016

The scrum master decided that the team can only meet 3 times a week due to the issues pointed out by the scrum development team.

1 Daily Scrum - 01 Aug 2016

Lesego : I created a github account. I started learning php. I am going to start working on the backend. I am having troubles configuring android studios.

Jackson : I created a github repository for everyone to push their work. However I need everyone's github username because I need to add you guys to the repository. I am going to start working on the view event item.

Thabiso : I created a github account. I started brushing up on my android programming. I am going on. I am kind of rusty with my android so that might delay the progress.

2 Daily Scrum - 03 Aug 2016

Lesego : I started writing the php files for registering a user. I am going to finish up the files for registering a user and then work on the login part. I am struggling with pushing to github.

Jackson : I finished writing the php files for the view event item. I am going to start working on the php files for the post event item. So far I haven't encountered any problems.

Thabiso : I created a new android project. I am working on designing the interface for login in the front end. I am still getting errors that I don't understand when I run the program. I am also struggling with the pushing.

3 Daily Scrum - 05 Aug 2016

Lesego : I finished the php files for registering a user. I am going to start working on the files for the login part. I still am struggling with pushing to github.

Jackson : I finished writing the php files for the post event item. I am going to start working on the front end for the post event item. I am going to help you guys do your first commit. I am still good, no problems thus far.

Thabiso : I finished the interface for the login front end. I am now going to start working on the registering a user to the app. I still have that github issue.

4 Daily Scrum - 08 Aug 2016

Lesego : I managed to fix the github problem. I am done with the php part. So the backend is basically done. I am going to be available if anyone needs help. I am going to push everything that I did.

Jackson : I finished the backend and front for the view and post event. I am going to be testing it from now on. I am need someone to help me test.

Thabiso : I finished the interface for the login and registering for the front end. I am am going to push everything that I have. I am able to access github now. I need help with integrating the front and backend.

5 Daily Scrum - 10 Aug 2016

Lesego : I helped Andries and Khutso with some of the documentation. I am going to finish up what I was helping them with. I need to study a little as my knowledge about their topics is vague

Jackson : I helped Thabiso incorporate the backend and the front for the login and register. I am going to work on making the app look beautiful. I am not struggling with anything at the moment.

Thabiso : I finished incorporating the front end and the backend. I am going to help Lesego with the documentation. I am not having any problems at the moment.
